

## Review - FAIRness of a dataset

Comment in the cells about the different components of FAIR.

<b>Name of the data set:</b>	
<b>Findable</b>	<i>Was it easy to find the dataset from the title?</i>  <i>Does the dataset have a DOI to make it more Findable?</i>  <i>Does it have enough metadata to easily find it?</i>
<b>Accessible</b>	<i>Is it clear for you if the data is accessible for re-use? How?</i>  <i>Are you able to download the data for your own use?</i>
<b>Interoperable</b>	<i>Is the dataset in a file format that you can easily re-use?</i>  <i>Are there references and/or links provided to other related data/code?</i>
<b>Re-usable</b>	<i>If you come across this dataset, how likely is it that you can easily use it?</i>  <i>Does the dataset have enough documentation for you to understand the context of the data?</i>  <i>Does it have a clear usage license? Which one?</i>
<b>What would you suggest for making the data set more FAIR?</b>
